PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science (2026) with strong programming skills in Python, Java, SQL, and JavaScript. Strong foundation in Object-Oriented Programming (OOP), Data Structures, DBMS, SQL, and Software Development fundamentals. Passionate about developing efficient software applications, solving real-world problems, and continuously learning new technologies.

TECHNICAL SKILLS

Programming Languages: Python, Java (Basic), JavaScript (Basic), SQL

Web Technologies: HTML, CSS, JavaScript

Databases: Oracle SQL, MySQL

Core Computer Science: Object-Oriented Programming (OOP), Data Structures, DBMS, Operating Systems (Basic)

Libraries & Frameworks: Pandas, NumPy, TensorFlow, Scikit-learn, OpenCV, Streamlit

Tools: Git, GitHub, Jupyter Notebook, VS Code, Postman

PROJECTS

AI-Based Solar Panel Dust Detection System

Python, TensorFlow, CNN, SVM, OpenCV

- Developed a hybrid CNN-SVM model for automated solar panel dust detection using image preprocessing, feature extraction, and classification.
- Improved prediction accuracy by optimizing the machine learning pipeline and implementing efficient data processing techniques.

Hyper RouteX: AI-Based Traffic Management System

Python, OpenCV, Flask, SQL

- Developed an AI-based traffic management system for real-time vehicle detection and traffic flow analysis using computer vision techniques.
- Built a modular application with database integration to support intelligent traffic monitoring and decision-making.

Superstore Sales Dashboard

Power BI, SQL, Excel

- Designed an interactive sales dashboard to analyze revenue, profit, regional performance, and product trends using Power BI and SQL.
- Created KPIs, charts, and data visualizations to support business decision-making and improve sales performance analysis.

EXPERIENCE

Qspiders — Python Full Stack with Data Analytics | Feb 2026 – Present

- Developed Python applications by applying Object-Oriented Programming (OOP) concepts and working with SQL databases for data management and query execution.
- Built responsive web applications using HTML, CSS, JavaScript, Python, and Django, while following software development best practices.
- Used Git and GitHub for version control and collaborated on development tasks in an Agile environment.

EDUCATION

NKOCET — B.Tech, Artificial Intelligence & Data Science Engineering | 2022 – 2026

CGPA: 7.05

ACHIEVEMENTS & LEADERSHIP

- Utility Patent – IJRASET 2025: **AI-Based Smart Dust Detection System for Solar Panels**
- IEEE Conference Paper – 2026: **Hyper RouteX: Next-Gen AI Traffic Control**, CIPHER2026, NIT Jalandhar

CERTIFICATIONS

Power BI Training – Infosys Springboard

Fundamentals of Deep Learning – NVIDIA

Advanced Google Analytics – Google Analytics Academy
